ABOUT ME

I'm a software developer that shifted my focus into the Flutter framework with hands-on experience building cross-platform apps. I've worked extensively with both Supabase and Firebase, which allows me to create reliable, real-time applications that scale well. I focus on following the best practices while keeping the user experience smooth and intuitive. What I enjoy most is taking an idea and turning it into reality that people love to use.

WORK EXPERIENCE

- **Junior Web Dev (WordPress)**
  ItsALovelyLife
  April 2020 - July 2020

  - My task was to maintain checkup and configurations of themes and C panels according to client's request. Using Trello for project management and slack for team communication. Altogether the site was hosted on BlueHost Domain
    Reference: Ellaine Palma - Senior Lead Dev

- **Frontend Web Developer**
  Blue Edge Business Solutions
  March 2021 - June 2021

  - Collaborated with a remote team to design and develop client based website using modern web design principles. My task was to organize and maintain the frontend, especially the CSS/HTML side and change on behalf of the client's request.

- **Flutter Developer**
  Vehicall - A vehicle rental system software
  August 2024 - April 2025

  - Part of a team on startup within my university, my task was to build the complete frontend Widget Elements through flutter, Integrated a backend using SUPABASE for user authentication, and real time messaging.

- **Flutter Developer**
  Agrolens - A rice disease detection software integrated with AI
  May 2025 - September 2025

  - My task was to design and develop the mobile app using the flutter framework and to integrate the trained CNN model into the widget tree.

- **Flutter Developer**
  SheRoams - A traveling app specifically tailored for women traveling to Bali, Indonesia
  November 2025 - Present

  - My task is to build the whole app from scratch, this includes design, frontend, and backend integration. As well as implements plugins and APIs such as weather, Paywall , currency exchange and Map integration. Tools used were Flutter, Firebase.
