ABOUT ME

I'm a software developer that shifted my focus into the Flutter framework with hands-on experience building cross-platform apps. I've worked extensively with both Supabase and Firebase, which allows me to create reliable, real-time applications that scale well. I focus on following the best practices while keeping the user experience smooth and intuitive. What I enjoy most is taking an idea and turning it into reality that people love to use.

WORK EXPERIENCE

Web Developer

ItsALovelyLife

April 2020 - July 2020

- Managed end-to-end WordPress operations on BlueHost, ensuring seamless site performance through custom theme configurations and CPanel administration. Collaborated with cross-functional teams via Slack and Trello to execute client-specific updates and technical optimizations.

Blue Edge Business Solutions

March 2021 - June 2021

- Collaborated with a remote team to design and develop client based website using modern web design principles. My task was to organize and maintain the frontend, especially the CSS/HTML side and change on behalf of the client's request.

Flutter Developer

Father Saturnino Urios University

May 2025 - December 2025

- Developed a mobile application as part of a team to detect rice diseases using Machine Learning. Optimized the system to identify diseases in real-world settings without requiring a white background. Responsible for designing the UI/UX and integrating a custom-trained CNN model into the Flutter framework for deployment.

Upwork

November 2025 - February 2026

- Spearheaded the end-to-end development of a niche travel application for women in Bali, Indonesia. Owned the entire product lifecycle, from UI/UX design to frontend and backend architecture. Integrated a robust suite of third-party APIs and plugins, including Google Maps, real-time weather services, currency exchange, and Paywall systems for monetization.

The Random Technologies Singapore

December 2025 - March 2026

- Collaborated within an agile team to develop a cross-platform AI training application that focuses on Business related coaching. Contributed to the integration of Gemini-powered voice features and assisted in managing the hybrid backend architecture using Supabase and Firebase. Actively participated in daily standups to execute frontend and backend tasks, ensuring smooth data flow and a responsive user experience.

EDUCATION

Bachelor of Science in Computer Science

Father Saturnino Urios University

SKILLS

Tech Stack:

- Flutter
- Firebase
- Supabase
- Appwrite

Tools:

- VS Code
- Github
- XCode
- Canva
