EXPERIENCE

Flutter Developer | Intern

02/2026 - 04/2026

FSUU Data Science Analytics Center

- Collaborated within a cross-functional team to design and develop a mobile application for real-time rice disease detection using machine learning.
- Solely architected a user-centric mobile interface tailored for field use, eliminating the need for controlled environments or white backgrounds for image capture.
- Utilized camera dependencies for AI power detection and optimized flutter version and configs based on pytorch_lite requirements.
- Integrated two custom-trained Convolutional Neural Network (CNN) into the mobile framework, ensuring seamless model inference and high prediction accuracy.
- Participated in daily meetings on site and team deliverables.

Flutter Developer

11/2025 - 03/2026

The Random Technologies Pte. Ltd

- Collaborated within a cross-functional development team to build an AI-powered mobile application focused on professional training and skill enhancement.
- Implemented app features and project codes on task assigned based on what was given by the scrum master.
- Primarily responsible for developing and implementing frontend features and designs but also implemented backend configs such as deep linking a customized web for forget password functionality and authentications.
- Utilized Notion for task breakdown, sprint planning, and team-wide assignment tracking
- Participated in daily stand-up meetings to report progress, address blockers, and align development priorities

Flutter Developer

11/2025 - 02/2026

Upwork (Client Based)

- Spearheaded the end-to-end development of a niche travel application for women traveling to Bali, managing the full lifecycle from initial UI/UX design to final deployment.
- Solely architected and implemented a robust full-stack solution, ensuring seamless communication between the frontend interface and backend services.
- Integrated a suite of essential travel APIs, including real-time weather forecasting, dynamic currency exchange rates, and interactive map services for enhanced navigation.
- Developed a secure monetization layer by implementing a Paywall system using Stripe to manage subscriptions and premium content access.
- Weekly standup update with client through WhatsApp.

WordPress Developer

03/2020 - 07/2020

ItsALovelyLife

- Maintain checkup and configurations of themes and C panels according to client's request. Using Trello for project management and slack for team communication. Altogether the site was hosted on BlueHost Domain

EDUCATION

Bachelor of Science in Computer Science

Father Saturnino Urios University

05/2026
